Dear Chip,

When we last spoke you mentioned some direct or indirect association with a producer with a good reputation in documentaries and I've forgotten the name.

If it was Oliver Stone then he is wasting time and endangering his reputation by having anything at all to do with that fraud who recently got loss of attention, Ricky ~~Ross~~ White.

It is my understanding that he has had to do with White, whose canard is that his father killed both JFK (with two associates) and Tippit.

It astounds me that there was so much uncritical acceptance of this phony merely because of coincidences, without any effort to get any assessment of the validity of his story.

Which is completely false.

He made it up. With help.

Nothing much new here. For us we are both OK.

Hope you (pl) are well, happy and prospering.

Harold
